aertronica	**QUALITY POLICY**	Date: 04/09/2025 Rev. 7

AERTRONICA S.r.l. aims to operate as a leading distributor of electronic and electromechanical products for industrial and aerospace applications.

To this end, it has implemented a Quality Management System that complies with the requirements of the UNI EN ISO 9001:2015 and AS 9120:2016 standards.

To achieve this, AERTRONICA is committed to:

- Determining and fully satisfying customer requirements and/or applicable statutory and regulatory requirements.
- Maintaining a proactive approach by exceeding customers' stated requirements, providing advice, suggesting the best alternatives, and offering optimal solutions, including for unstated needs.
- Responding promptly to customer requests.
- Utilize its technical expertise and industry knowledge to source and propose to customers even difficult-to-obtain components.
- Selecting and retaining reliable suppliers.
- Ensuring the professional development of all employees and promoting autonomy in the organization of their work.
- Monitoring processes and their performance in order to meet the requirements and expectations of interested parties, within a management system aligned with ESG principles.

In order to achieve these objectives, AERTRONICA:

- Is committed to the continual improvement of the effectiveness of its QMS.
- Is committed to establishing and periodically reviewing quality improvement objectives, as well as objectives related to ESG aspects.
- Communicates this policy internally to all personnel.
- Is committed to keeping this policy active, up to date, and aligned with the company's purpose and objectives.
- Is committed to analyzing and monitoring its operating environment and implementing appropriate risk prevention actions.
- Is committed to minimizing the risk of supplying counterfeit parts by procuring products exclusively through authorized channels.

The guidelines set forth in this policy are implemented through the PDCA (Plan-Do-Check-Act) methodology and provide the framework for the annual definition of KPIs. This is done with full awareness that the products and services supplied are used in specific and often critical applications, and therefore every possible action is taken to mitigate risks.

All personnel, beginning with General Management, are committed to implementing and maintaining the Company's Quality Management System. Each employee, within their respective area of responsibility, supports the Quality Manager in fulfilling the general principles set forth in this policy and in achieving the specific objectives established periodically.

AERTRONICA ensures free access, subject to prior agreement, to customers and, where applicable, to regulatory authorities for audits and inspections.

General Management is committed to promoting awareness of the Company's Quality Policy, reviewing its continued suitability on an annual basis, and providing all necessary means and resources to achieve the established objectives.
